Certificate of RoHS Compliance

To Whom It May Concern:

Thank you for your recent inquiry regarding Oak-Mitsui Aluminum Bonded Copper products and their compliance with the European Parliament's Restriction on Hazardous Substances (RoHS) and the Waste Electrical and Electronic Equipment (WEEE) Directive. Oak-Mitsui hereby certifies that its Aluminum Bonded Copper products comply with both the RoHS and the WEEE Directives (and the pending amendment by the EU Commission) and do not exceed the maximum concentration values for cadmium, lead, hexavalent chromium, mercury, polybrominated biphenyl (PBB) and Polybrominated diphenyl ether (PBDE).

Oak-Mitsui employed the services of an independent laboratory to obtain certified material analysis, which the confirmed the results of Oak-Mitsui's internal testing. Products tested were confirmed to be compliant with the RoHS Directive.

Should you have any additional questions or need assistance, please contact me via email at diana.porter@oakmitsui.com or via telephone at 803.425.7904.

Respectfully,

C. Diana Porter
